

Coordinated Disclosure of Security Vulnerabilities

If you've discovered a security vulnerability in Charon, we appreciate your help in disclosing it to us in a coordinated manner. There's no stated bounty program because the code's immutable and there's no team here so no one really has any more tokens or control than any other user. That said, if you want to run it by someone who knows the code, give us a chance to get out, and/or get maybe like an nft or something, shoot an email to [nick @ 911truth.com].
